**ALBRIGI** S.p.A.  
TECNOLOGIE

The **Albrigi Technologies** Limited Liability Company, whose owner is Mr Stefano Albrigi, is a firm reality with a thirty-year-long know-how about blending system setting-up, fluids and pharmaceutical, food and chemical products storage and processing.

Once more, **Stefano Albrigi** confirms his will to propose turnkey solutions starting from specific client needs and distinctive characteristics of the reference market.

**Albrigi Technologies** gave proof of having the capability to realize innovations able to revolutionize the production methods of whole sectors and/or products.

The excellent results reached in all these years of activity allow us looking at the future with serenity

We plan, built, install, and manage the technical and maintenance service of systems and devices designed for the pharmaceutical, cosmetic, food and chemical processing sector, providing turnkey products.

We have unique equipments, result of years of experience, tested, homologated and certified according to the most serious European rules.

We are aware of the fact that our products involve the final consumer directly and, for this reason, we are serious, professional and conscientious in our work.

Our "Must" is an always-careful eye on technological evolutions, respect of the environment, costs and resources optimization.

**MISSION**

# "HONOS ALIT ARTES"

*" A Company rises and evolves from the lessons, experience and example lavished by the ones who came first and the ones who share the objectives and goals today".*

*Stefano Albrigi*
